

# TACTICAL GAMING CERTIFICATE

---

College: College of Social Sciences & Professional Studies

Center for Professional Studies

The Tactical Gaming Certificate focuses on providing students with decision making skills at all levels: tactical, strategic, and competitive. This provides a theoretical framework for understanding the decisions they will need to make as players, competitors, and teams. It will also help them develop the skills to transfer their decision making into a career through the principles of entrepreneurship. And, the certificate will help them see the place of sport – traditional and electronic – in our society. Whatever a gamer chooses to major in, the skills learned in the Tactical Gaming Certificate will help them succeed in the gaming arena and in life.

## Learning Outcomes

1. identify, interpret, and use oral, written, visual, and nonverbal communication skills that are effective in diverse contexts.
2. demonstrate professional behaviors in interdisciplinary and diverse team environments as they relate to esports.
3. examine, appraise, and execute ethical best practices in esports.
4. identify, articulate, appraise, and analyze the impact esports.
