ESPORTS AND GAMING CERTIFICATE

College: College of Social Sciences & Professional Studies

The eSports and Gaming Certificate focuses on providing students with decision making skills at all levels: tactical, strategic, and competitive. This provides a theoretical framework for understanding the decisions they will need to make as players, competitors, and teams. It will also help them develop the skills to transfer their decision making into a career through the principles of entrepreneurship. And, the certificate will help them see the place of sport – traditional and electronic – in our society. Whatever a gamer chooses to major in, the skills learned in the eSports and Gaming Certificate will help them succeed in the gaming arena and in life.

Program Learning Outcomes

- 1. Identify, interpret, and use oral, written, visual, and nonverbal communication skills that are effective in diverse contexts.
- Demonstrate professional behaviors in interdisciplinary and diverse team environments as they relate to esports.
- 3. Examine, appraise, and execute ethical best practices in esports.
- 4. Identify, articulate, appraise, and analyze the impact esports.
- Demonstrate the ability to work within a team structure to achieve group goals.
- Demonstrate the ability to integrate tactical and strategic decision making.
